Blockhaus de type R2

Blockhaus de tir frontal de forme hexagonale construit par le BEF doté de deux créneaux pour fusil mitrailleur ou mitrailleuse

This is a black and white aerial photograph showing a residential neighborhood. In the upper left, a large, light-colored building, possibly a church or institutional facility, has a prominent gabled roof. To its right is a cluster of houses with dark roofs. A road runs diagonally from the bottom left towards the center. In the lower right, there's a larger, more complex residential structure with multiple gables and several windows. The terrain appears to be a mix of developed land and some open fields or undeveloped land.
